

SKZ135 Rubber Density Meter

The meter is used to measure the density of rubber and similar material.

The results can be directly read out. And easy to use and operate and suitable for quick test of manufacturability in workshop and studies department. standard HG4-1468 & GB 1033.

Technical parameters:

1. specimen weight: 5g-20g
2. scale range: density 0.9—2.0 indexing 0.01g/cm³
 density 2.0—2.5 indexing 0.02g/cm³
 density 2.5—3.0 indexing 0.05g/cm³
3. accuracy: 0.005
4. Dimension: 310mm×140mm×303mm
5. Weight: 6kg
